EDUCATION

Trinity College Dublin September 2023 – May 2027
Bachelor of Science in Computer Engineering Dublin, Ireland

EXPERIENCE

AI Engineering Intern May 2026 – July 2026
Dailoga Noida, India

- Built an agentic home-loan origination system using LangChain `create_agent`, orchestrating multi-turn workflows for EMI, DTI, FOIR, LTV, KYC/CIBIL, document verification, and underwriting.
- Engineered PostgreSQL persistence and containerized the system with Docker Compose, integrating Ollama and Groq for configurable local/cloud LLM execution.
- Built an Opik evaluation and observability pipeline for response quality, agent trajectory, and regression testing, achieving 100% pass scores across validated applicant flows.

Frontend Developer Intern May 2025 – July 2025
Interra Systems Noida, India

- Developed guided tours and step-based walkthroughs in Angular (v10) with Driver.js, reducing new-user onboarding time by 40% and support queries by 25%.
- Resolved Angular build and dependency issues, ensuring 100% successful deployments across multiple projects.
- Authored integration and troubleshooting guides, cutting developer onboarding time by 30%.

Cohort Leader Jan 2026 – Present
Claude Builder Club, Trinity College Dublin Dublin, Ireland

- Organised a student hackathon and helped participants access free API credits, driving wider participation in hands-on AI building.
- Led sessions on Claude, prompt engineering, and practical AI workflows, helping students apply LLMs effectively in their own projects.
- Supported members during events and workshops with technical guidance and resources, growing engagement within the club.

PROJECTS

-
- **Float – AI-Powered CFO** | *Python, LLMs, Twilio, ElevenLabs, Stripe, OCR* Feb 2026
 - Built an AI-powered CFO platform in **30 hours at HackEurope**, helping small businesses monitor runway, cashflow risk, payroll exposure, and overdue invoices.
 - Automated invoice extraction and collections workflows using OCR, Twilio, and ElevenLabs, enabling AI-driven debt collection calls and follow-ups.
 - Integrated Stripe payment links and end-to-end payment tracking, connecting financial risk detection to automated recovery workflows.
 - **JBAC AI Trading & Financial Analysis Platform** | *Python, FastAPI, Angular, AWS* Sep 2025
 - Developed an AI-driven platform to analyse financial data and generate trading insights using Pandas, NumPy, and LLMs.
 - Implemented financial risk metrics including return analysis, volatility estimation, and trend analysis for decision support.
 - Designed a multi-agent system, improving prediction accuracy by **25%**.
 - Built interactive dashboards to visualize market performance, increasing user engagement by **50%**.
 - **AI-Powered Job Search Assistant** | *Python, IBM Watsonx, Django, Gradio* Aug 2025
 - Engineered an automation workflow to evaluate resume-job compatibility and generate interview preparation documents.
 - Accelerated job preparation and search by **95%**, eliminating multi-hour manual tasks.
 - Built a real-time web scraper to fetch job details and compile historical interview data **90× faster** than manual research.
 - Integrated Gradio and IBM Watsonx models to deliver actionable insights through an interactive user interface.

SKILLS

-
- **Languages:** Python, C/C++, JavaScript, TypeScript, SQL
 - **AI/ML & GenAI:** PyTorch, Scikit-learn, LangChain, RAG, LLMs, Ollama
 - **Backend & Databases:** FastAPI, Flask, PostgreSQL, MySQL
 - **Infrastructure & Tools:** Docker, AWS, Git, Streamlit
